

HyMo-Box

NEOMERIS

POWERED BY HOHENSTEIN ●

What is the HyMo Box?

The HyMo-Box is a hygiene monitoring box for self-monitoring of hygiene. Whether at home or on the road - at work or during leisure time - no matter where: There are a multitude of hygienically sensitive places. Do you know the hygienically particularly sensitive places and relevant processes in your environment? Do you know what your current hygiene status is? Do the cleaning and disinfection measures you apply work efficiently? Is your current cleaning and hygiene concept sufficient or would you like to optimize quality specifications in this regard?

Hygiene management means „hygiene to the point

Hygiene monitoring is made easy with the HyMo-Box. Take your hygiene management into your own hands.

It combines uncomplicated handling with professional microbiological testing in our accredited laboratory.

How is the HyMo box constructed?

It contains:

- Cooling box with cooling element
- RODAC plates
- Hand disinfectant
- waterproof pen
- a manual
- sampling plan

The HyMo-Box provides you with reliable findings, regardless of whether the focus for you is on the hygienic safety of work surfaces, floors or fittings, and is individually equipped depending on the area of application.

You can find the HyMo-Box that is right for you as well as further information on the specific areas of application here: -

In cooperation with the Hohenstein Institute, an accredited testing laboratory, we are the competent partner at your side when it comes to self-monitoring hygiene on your premises. Hohenstein is owner-managed in the 3rd generation. We, as a subsidiary of Heyl Analysentechnik GmbH, have also been family-owned for over 60 years. With the partnership of our two companies, competences in the field of hygiene and consulting are bundled for you.

Your advantages at a glance:

- You can monitor your cleaning and disinfection yourself based on an easy-to-use method.
- Cost-effective solution without hidden costs
- Modular system for a wide range of applications
- Analysis of your samples by an accredited testing institute according to DIN EN ISO/IEC 17025
- Summary of the results in an easy-to-understand report
- This provides you with reliable confirmation of your self-monitoring by an independent institution.
- Regular self-monitoring gives you the security of consistent hygiene

Using the globally established smear test method, the accredited microbiological laboratory from the Hohenstein Institute determines important key figures and recommendations for all surfaces tested.
